MERGEPOINT ②

γ?

MERGEPOINT ③

WHAT'S THE OPPORTUNITY?
 Have local students serve as community "advisors" when running a training workshop for RHT Westford associates: WNEC, Worcester, UNH, RIT

HOW WILL IT HAPPEN?
 Identify 1-2 students per school - students need to be prepared! (TAs? Last year?)
 Check policy for external training guests
 Gauge workshop demand in Westford

MERGEPOINT

①

WHAT'S THE OPPORTUNITY?

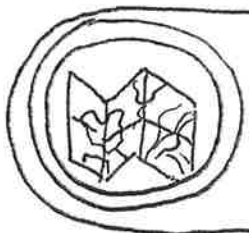

Have students write reviews of File features as they appear in the Beta - QA + marketing can handle their contributions while I'm in CA and it'll get more testing + writing done for the release

HOW WILL IT HAPPEN?

Talk w/ Robyn (Marketing) and Adam (QA) to set up appropriate sprints + test days
 Use QA/mktg SOPs to develop assignments with POSSE profs this summer

WHAT'S THE OPPORTUN

HOW WILL IT HAPPEN?

PITCH NOTES

adopt SparkleShare for team filesharing

can try w/ 2 colleagues at first

all FOSS, already packaged

if it works I'd like time to put it into RHEL6

← EPEL?

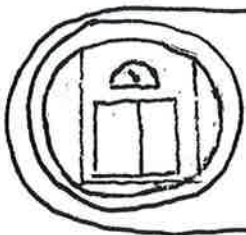

need packaging skills.

maybe I can trade with Bill - if he needs a nice banner design...

WHAT DATA WOULD MAKE THIS COMPELLING?

- # files shared
- discussion time on new design shorter

OUT

ROUND 1

You say "uh" a lot.

I don't care about the Fedora Design team,
but the sparkleshare tool sounds interesting -
pitch me on that.

ROUND 2

Internally adopting a tool used by the
Fedora community - good idea!

How mature is it?

Anyone else using it?

"oh, I know main"

who else needs to
get involved?
who will you host?

ROUND 3

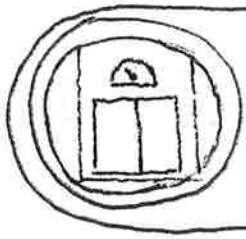

How much of your time will this take?

Yes! Showing blogpost == good idea.

what if it doesn't work?

[NOTE: all 3 rounds
are each a
different person
giving feedback,
but my handwriting
is nondisguisable.]

what was most surprising?

we could keep up with that many other convos in the same channel

what was most frustrating?

15:20:01 - if I didn't know you got some water I'd be confused

what was most helpful?

pastebin! I see why you don't want to flood a channel

other comments?

tell me when you're going atk!

should we have pin'd?

PASTEBIN is a command-line app?

Awesome!
