mydeck10* (1905 facts, 3816 cards) – Anki 0.9.3

an attack/strike
攻撃 こうげき
Well done! This card will appear again in 1.1 years.

okinawa
沖縄
おきなわ

How well did you remember?

0	First time	
1	Made a mistake	
2	Difficult	Next in 8.0 months
3	About right	Next in 1.4 years
4	Easy	Next in 1.8 years

Remaining: 0 + 1 + 0 | ETA: 11 seconds | Reviewing

The screenshot shows the Anki 0.9.3 application window. At the top, there's a toolbar with various icons for file operations like new, open, save, and search. Below the toolbar, the title bar displays "mydeck10* (1905 facts, 3816 cards) – Anki 0.9.3". The main content area contains a flashcard for the word "okinawa". The front face of the card has the English word "okinawa" in large, bold, black font, followed by the Japanese characters "沖縄" (Okinawa) in large, bold, black font, and the romaji "おきなわ" below it. Above the card, the Japanese definition "an attack/strike" and its English equivalent "攻撃 こうげき" are shown. A message at the top indicates "Well done! This card will appear again in 1.1 years." Below the card, a section titled "How well did you remember?" presents a five-point rating scale. The options are numbered 0 through 4, each associated with a description: "First time", "Made a mistake", "Difficult" (with a note "Next in 8.0 months"), "About right" (with a note "Next in 1.4 years"), and "Easy" (with a note "Next in 1.8 years"). At the bottom of the window, a progress bar shows "Remaining: 0 + 1 + 0" and "ETA: 11 seconds", along with a "Reviewing" button.

21:42 <@trose> the goal of this bot is to be an automatic translation tool that you don't have to think about

21:43 < alsroot> trose: yup, I see

21:47 <@trose> were you looking to fork transbot into a plugin or are you already working on something?

21:49 < alsroot> trose: nope, it is not a fork, supybot plugin has abs. different structure

21:50 <@trose> alsroot, i'm just curious, this could be an good collaboration if we're both working towards the same goal

(#transbot-test-en)

21:42 < transbot0> trose> el objetivo de este robot es ser una herramienta de traducción automática que no tienes que pensar en

21:43 < transbot0> alsroot> dextrosa:
Sí, veo

21:47 < transbot0> trose> era lo que buscaba al tenedor transbot en un plugin o está ya trabajando en algo?

21:49 < transbot0> alsroot> dextrosa:
No, no es un tenedor, supybot plugin tiene ABS. estructura diferente

21:50 < transbot0> trose> alsroot, sólo soy curioso, esto podría ser una buena colaboración, si los dos estamos trabajando hacia el mismo objetivo
(#transbot-test-es)
